TELESPHERE SOFTWARE LAUNCHES ADVANTAGE CIRCUIT MANAGEMENT V2.1

NEW SaaS PLATFORM POSITIONS TELESPHERE AS THE INDUSTRY LEADER FOR THE MANAGEMENT OF SPECIAL CIRCUIT REVENUE.

Missoula, MT, April 11, 2014 – TeleSphere Software, Inc., (TeleSphere) a leading nationwide telecommunications billing software, professional services and SaaS provider, announces the launch and general availability of Advantage Circuit Management (ACM) version 2.1.

TeleSphere's ACM is an Operations Support System specially designed for the management of access service requests (ASRs), circuit and facility design, inside plant inventory and workflow optimization.

"Many of our rural ILEC and CLEC customers and our parent company, Blackfoot Telecommunications Group, are Metaswitch users. The ACM platform is very complimentary to the Metaswitch infrastructure products," comments Todd Twete, TeleSphere's National Sales Director. "While common special circuit management processes employ the use of spreadsheets or other in-house solutions, such practices have proven to be manually intensive, inefficient and problematic. These challenges are heightened due to the ever increasing demand for bandwidth and the influx of special circuit ASRs."

Via a Web-based, user-friendly GUI, ACM functionality ensures the realization of special circuit revenue and eliminates ongoing expenses when an off-net circuit is not in use.

Facility and rack inventory management tools will enhance network asset visibility and minimize notorious and costly "truck rolls". Operations, accounting and sales personnel can view workflow statuses, service-level agreements, customer contracts, images and other documentation thereby enhancing customer satisfaction and retention.

METASWITCH FORUM 2014

Themed "The Brains of the New Global Network," Metaswitch Forum takes place May 12-15, 2014, at the Hyatt Regency New Orleans. The annual Metaswitch Forum brings together communication service providers, technology vendors and expert speakers from around the world for three days of discussions on innovative products, industry trends and best practices on network transformation, cloud computing and the rise of software Telcos. Please visit http://www.metaswitchforum.com, search #mforum14 or follow @metaswitch on Twitter for details.
